

August 2011 Mayor's Report

August is going to be an exciting month for the City of Plano. We had the ground breaking ceremony on July 5th at 5:00 pm for the new police building at the site directly east of City Hall. Work on the building will be in full swing in August.

The folks from the film "Autumn Frost" are making great progress in the building of the set on Main St. If you haven't been to Main St in a while, go there and see the amazing amount of work that has been done. When you are downtown, go to the stores and restaurants, they will appreciate your business.

Some of the major issues that the City Council is currently working on are the City Center TIF, the Eldamain TIF, the new residential garbage contract and a host agreement for a possible transfer station in the Eldamain Industrial Park.

We welcome the new businesses that are locating in the City. Memories Restaurant and Bar opened in July and at least 2 more new businesses will be opening soon if everything goes as planned.

I will continue to meet with our existing businesses as part of the Business Retention Program. This new program shows the business community that the City is committed to being a partner with them for the success of their business and the Citizens of the City of Plano.
