Mr. Joshua Beyer, Water Superintendent  
City of Plano  
17 E. Main Street  
Plano, IL 60545

Re: VSAT, Risk and Resilience, ERP – Proposal to Update Report  
HCE Project No. 21999

Dear Mr. Beyer:

Hamilton Consulting Engineers, Inc. (HCE) is pleased to submit this proposal to update the City's VSAT, Risk and Resilience, ERP Report. The City of Plano's most recent (and probably first) Risk and Resilience, and ERP reports were required to be filed with the USEPA in 2002. The current requirement is that you update and recertify those reports every 5 years. In order to update and recertify these reports, HCE proposes to:

1. Review the existing 2002 Emergency Response Plan (ERP) and determine extent of work needed to update.
  - a. We will evaluate the current plan using the EPA's online Vulnerability Self-Assessment Tool (VSAT).
  - b. If the existing ERP meets the current requirements for a Community Water System's Risk and Reliance Assessment and as a Community Water System's Emergency Response Plan, HCE will certify the report within the EPA online system.
  - c. If the report requires updating, we will prepare the updated report utilizing the IPE ERP template, discuss it with you, submit it to the EPA and certify within the online system.
2. Once the report is completed and certified within, all contact information will be changed to your/City information.

The budget for the work described will be a not-to-exceed amount of \$13,500.00, invoiced as time and expense.

If you have any questions, please contact our office.

Very truly yours,  
Hamilton Consulting Engineers, Inc.

Howard J. Hamilton, PE, CFM, CPESC  
President

# RISK AND RESILIENCE ASSESSMENTS AND EMERGENCY RESPONSE PLANS:

## NEW REQUIREMENTS FOR DRINKING WATER UTILITIES

Section 2013 of America's Water Infrastructure Act of 2018 (AWIA) requires community water systems<sup>1</sup> that serve more than 3,300 people to complete a risk and resilience assessment and develop an emergency response plan.

### RISK AND RESILIENCE ASSESSMENT

Your utility must conduct a risk and resilience assessment and submit certification of its completion to the U.S. EPA by the following dates:

- March 31, 2020 if serving  $\geq 100,000$  people.
- December 31, 2020 if serving 50,000 to 99,999 people.
- June 30, 2021 if serving 3,301 to 49,999 people.

### EMERGENCY RESPONSE PLAN

Your utility must develop or update an emergency response plan and certify completion to the U.S. EPA no later than **six months** after risk and resilience assessment certification. Each utility deadline is unique; however, the dates below are the due dates for utilities who submit a risk and resilience assessment certification by the final due date according to the population served.

- September 30, 2020 if serving  $\geq 100,000$  people.
- June 30, 2021 if serving 50,000 to 99,999 people.
- December 31, 2021 if serving 3,301 to 49,999 people.

Important Dates

Recertification

**Every five years**, your utility must review the risk and resilience assessment and submit a recertification to the U.S. EPA that the assessment has been reviewed and, if necessary, revised.

**Within six months** of submitting the recertification for the risk and resilience assessment, your utility must certify it has reviewed and, if necessary, revised, its emergency response plan.

Visit the U.S. EPA website to find more information on guidance for developing a risk and resilience assessment at <https://www.epa.gov/waterriskassessment/conduct-drinking-water-or-wastewater-utility-risk-assessment>.

Visit the U.S. EPA website for guidance on developing an Emergency Response Plan at <https://www.epa.gov/waterutilityresponse/develop-or-update-drinking-water-or-wastewater-utility-emergency-response-plan>.

### TOOLS OR METHODS

AWIA does not require the use of any standards, methods or tools for the risk and resilience assessment or emergency response plan. Your utility is responsible for ensuring that the risk and resilience assessment and emergency response plan address all the criteria in AWIA Section 2013(a) and (b), respectively. The U.S. EPA recommends the use of standards, including AWWA J100-10 Risk and Resilience Management of Water and Wastewater Systems, along with tools from the U.S. EPA and other organizations, to facilitate sound risk and resilience assessments and emergency response plans.

<sup>1</sup> Section 2013 of AWIA applies to community water systems. Community water systems are drinking water utilities that consistently serve at least 25 people or 15 service connections year-round.

Still have questions about the new AWIA requirements?  
Contact the U.S. Environmental Protection Agency (U.S. EPA) at [dwresilience@epa.gov](mailto:dwresilience@epa.gov).

## FREQUENTLY ASKED QUESTIONS

### I need more information about risk and resilience assessments and emergency response plans:

Risk and resilience assessments evaluate the vulnerabilities, threats and consequences from potential hazards.

#### What does a risk and resilience assessment include?

- Natural hazards and malevolent acts (i.e., all hazards).
- Resilience of water facility infrastructure (including pipes, physical barriers, water sources and collection, treatment, storage and distribution, and electronic, computer and other automated systems).
- Monitoring practices.
- Financial systems (e.g., billing systems).
- Chemical storage and handling.
- Operation and maintenance.

#### Who should I work with when creating my emergency response plan?

- Utilities must coordinate the risk and resilience assessments, as well as the emergency response plans with local emergency planning committees.

For more information, see [www.congress.gov/bill/115th-congress/senate-bill](http://www.congress.gov/bill/115th-congress/senate-bill).

#### What does an emergency response plan include?

- Strategies and resources to improve resilience, including physical security and cybersecurity.
- Plans and procedures for responding to a natural hazard or malevolent act that threatens safe drinking water.
- Actions and equipment to lessen the impact of a malevolent act or natural hazard, including alternative water sources, relocating intakes and flood protection barriers.
- Strategies to detect malevolent acts or natural hazards that threaten the system.

### I need more information on the certification process:

#### What do I need to submit to the U.S. EPA?

- Each utility must submit a certification of your risk and resilience assessment and emergency response plan. Each submission must include: utility name, date and a statement that the utility has completed, reviewed or revised the assessment. The U.S. EPA has developed an optional certification template that can be used for email or mail certification. The optional certification form will be available in August 2019.

#### Who can certify my risk and resilience assessment and emergency response plan?

- Risk and resilience assessments and emergency response plans can be self-certified by the utility.

#### How do I submit my certification?

- Three options will be provided for submittal: regular mail, email and a user-friendly secure online portal. The online submission portal will provide drinking water systems with a receipt of submittal. The U.S. EPA recommends using this method. The certification system will be available in August 2019.

#### When can I submit the initial certification?

- Utilities should wait to submit the initial certification to the U.S. EPA until the U.S. EPA publishes *Baseline Information on Malevolent Acts Relevant to Community Water Systems*, which is required under AWIA by August 2019.

#### Do I need to submit my certification to my state or local government?

- No. Section 2013 of AWIA does not require utilities to submit the certification to state or local governments.

#### How long do I need to keep a copy of my risk and resilience assessment and emergency response plan?

- Utilities need to keep a copy of both documents for five years after certification.

#### What if I do not have a copy of my most recent risk and resilience assessment?

- The U.S. EPA intends to destroy vulnerability assessments (VAs) submitted in response to the Bioterrorism Act of 2002, but if utilities would like to have their VA and certification documents mailed to them, contact [WSD-Outreach@epa.gov](mailto:WSD-Outreach@epa.gov), and on utility letterhead, include the utility name, PWSID, address and point of contact as an attachment to the email.

## RESOURCES & TOOLS

#### Conducting a Risk and Resilience Assessment

- The U.S. EPA's Risk and Resilience Baseline Threat Document (available August 2019).
- The U.S. EPA's Vulnerability Self-Assessment.

#### The U.S. EPA Website

- <https://www.epa.gov/waterresilience/america-water-infrastructure-act-2018-risk-assessments-and-emergency-response-plans>.

#### Developing an Emergency Response Plan

- Emergency Response Plan Guidance.
- The U.S. EPA's Emergency Response Webpage.
- Local Emergency Planning Committees.

Price Level: 125

# Selected Equip & Specs

### Dimensions

• Exterior length: 198.8" • Exterior width: 78.9" • Exterior height: 69.4" • Wheelbase: 119.1" • Front track: 66.9" • Rear track: 66.9" • **Min ground clearance: 7.6"** • Front legroom: 40.9" • Rear legroom: 40.7" • Front headroom: 40.7" • Rear headroom: 40.4" • Front hiproom: 59.3" • Rear hiproom: 59.1" • Front shoulder room: 61.8" • Rear shoulder room: 61.3" • Passenger volume: 118.0cu.ft. • Cargo volume: 52.0cu.ft. • Cargo volume seats folded: 90.3cu.ft. • Maximum cargo volume: 90.3cu.ft.

### Powertrain

\* **285hp 3.3L DOHC 24 valve V-6 engine with variable valve control, gasoline direct injection** • Recommended fuel : regular unleaded • ULEV II • 10 speed automatic transmission with overdrive • All-wheel • Fuel Economy Cty: N/A • Fuel Economy Highway: N/A • Capless fuel filler

### Suspension/Handling

• Front independent strut suspension with anti-roll bar, gas-pressurized shocks • Rear independent multi-link suspension with anti-roll bar, gas-pressurized shocks • Electric power-assist rack-pinion Steering • Front and rear 18 x 8 black steel wheels • P255/60WR18 BSW AS front and rear tires

### Body Exterior

• 4 doors • Driver and passenger power remote, manual folding door mirrors • Black door mirrors • Lip rear spoiler • Body-coloured bumpers • Class III trailer hitch • Trailer harness • Clearcoat paint • Front and rear 18 x 8 wheels • 1 front tow hook(s)

### Convenience

• Dual zone front automatic air conditioning with air filter • Cruise control with steering wheel controls • Power windows • Driver and passenger 1-touch up • Driver and passenger 1-touch down • Power door locks • Manual tilt steering wheel • Manual telescopic steering wheel • Day-night rearview mirror • Ford Fleet Telematics internet access • Wireless phone connectivity • 1 1st row LCD monitor • Dual visor mirrors • Driver and passenger door bins

### Seats and Trim

• Seating capacity of 5 • Front bucket seats • 8-way 6-way power driver seat adjustment • Manual driver lumbar support • Power height adjustable driver seat • 4-way passenger seat adjustment • 35-30-35 folding rear split-bench seat • Cloth seat upholstery • Metal-look instrument panel insert

### Entertainment Features

• AM/FM stereo radio • External memory control • Steering wheel mounted radio controls • 4 speakers • Integrated roof antenna

### Lighting, Visibility and Instrumentation
